The CKiD Study: Progression, Cognition, Bone Health and CVD Risk Factors in Children with CKD

Susan L. Furth, MD

Guest Editor

TABLE OF CONTENTS

- 403 **Biomarkers, Imaging and Patient Reported Outcomes in The Chronic Kidney Disease in Children Study**
Susan Furth and Bradley A. Warady
- 405 **Kidney Disease Progression in Children and Young Adults With Pediatric CKD: Epidemiologic Perspectives and Clinical Applications**
Derek K. Ng and Christopher B. Pierce
- 416 **Plasma and Urine Biomarkers of CKD: A Review of Findings in the CKiD Study**
Ibrahim Sandokji and Jason H. Greenberg
- 427 **Ultrasound-Based Renal Parenchymal Area and Kidney Function Decline in Infants With Congenital Anomalies of the Kidney and Urinary Tract**
Bernarda Viteri, Mohamed Elsinger, Jennifer Roem, Derek Ng, Bradley Warady, Susan Furth, and Gregory Tasian
- 434 **Cardiovascular Disease Risk Factors in Chronic Kidney Disease in Children**
Mark M. Mitsnefes
- 439 **Adverse Consequences of Chronic Kidney Disease on Bone Health in Children**
Jubi Kumar and Farzana Perwad
- 446 **Neurocognition in Pediatric Chronic Kidney Disease: A Review of Data From the Chronic Kidney Disease in Children (CKiD) Study**
Rebecca J. Johnson and Lyndsay A. Harsbman
- 455 **Decreased Neural Connectivity in the Default Mode Network Among Youth and Young Adults With Chronic Kidney Disease**
John D. Herrington, Erum A. Hartung, Nina C. Laney, Stephen R. Hooper, and Susan L. Furth
- 462 **Functional Magnetic Resonance Imaging Findings in Children and Adolescents With Chronic Kidney Disease: Preliminary Findings**
Waverly Harrell, Debbie S. Gipson, Aysenil Belger, Mina Matsuda-Abedini, Bruce Bjornson, and Stephen R. Hooper
- 476 **Patient-Reported Outcomes in Children With Chronic Kidney Disease**
Leonela Villegas and Sandra Amaral

On the cover:

Horizontal sections showing mean activation above $z = 2.3$ for control participants (above) and CKD patients (below) during the encoding phase.
